Introduction

1. In response to the note of the Secretary-General of UNCTAD dated 23 November 1973 requesting information regarding the operation of the schemes of generalized preferences introduced by preference-giving countries, the Government of Austria has provided information on imports of products covered by its scheme, including major products and their principal beneficiary suppliers for the period from 1985 to 1987. 1/ A summary of the information on imports from beneficiaries in these years is given in table 1 of the statistical annex, showing, for all and individual groups of beneficiaries (part A) as well as for each individual beneficiary (part B), total, MFN dutiable, covered and preferential imports of products falling within CCCN chapters 1-24, 25-99 and 1-99. The data on imports of major products and their principal beneficiary suppliers in 1987 is highlighted in table 2.

Austrian imports from beneficiaries of its scheme in 1985, 1986 and 1987

2. Austria recorded imports from more than 120 countries and territories recognized as beneficiaries of its scheme of generalized preferences in 1985, 1986 and 1987. Well over 80 per cent of these beneficiaries supplied goods falling within the purview of its GSP scheme, of which more than half (65 in 1985, 66 in 1986 and 73 in 1987) availed themselves of the benefits of preferences.

3. Austrian imports from beneficiaries in 1985 amounted to $2,270.2 million, of which $1,954.7 million, or 86.1 per cent, were MFN dutiable. While about 94 per cent ($1,832.3 million) of these dutiable imports were covered by the scheme, only 16.3 per cent ($298.5 million) actually received preferential treatment. In contrast, imports which actually benefited from GSP treatment in 1987 represented 31.2 per cent ($633 million) of the value of those covered by the scheme ($2,031 million).

4. Despite the small decreases in the share of covered imports in dutiable imports (2.3 per cent from 1985 to 1986 and 1.1 per cent from 1986 to 1987), the rate of utilization of scheme (share of preferential imports covered imports) was substantially improved during the period 1985-1987, as it rose by nearly 8 per cent from 1985 to 1986 and by 7.1 per cent from 1986 to 1987. A few countries and territories, in particular Yugoslavia, Republic of Korea, Romania, Taiwan Province of China, Turkey and Hong Kong, contributed to this improvement in the utilization rate.

5. As in the past, the proportion of covered imports to dutiable imports of both industrial and agricultural products exceeded by far the rate of utilization of the scheme. The reason is clear: this low rate of utilization was largely due to the fact that imports of certain products covered by the scheme, such as bananas (CCCN ex 08.01), raw coffee beans (CCCN ex 09.01), raw cocoa beans (CCCN ex 08.01), and crude oil (CCCN ex 27.09), for which MFN tariff rates were temporarily suspended on a world-wide basis and which

---

1/ For convenience, only imports of major products and their principal beneficiary suppliers are analysed in this document.

constituted the bulk of covered imports, were not reported as receiving GSP treatment and thus were not included in the value of preferential imports (column 5). This results in a substantial understatement not only of the rate of utilization for all and individual categories of products but also of the rates of utilization of the scheme by all and various groups of beneficiaries as well as by individual beneficiaries, especially by those supplying the bulk of goods subject to this tariff treatment.

6. More than a dozen major beneficiary suppliers (MS) accounted for 79 per cent in 1985, 86.2 per cent in 1986 and 83.4 per cent of preferential imports from all beneficiaries. By order of importance of their imports receiving GSP treatment, these major supplying beneficiaries were in:

1985: Yugoslavia, Republic of Korea, Taiwan Province of China, Hong Kong, Romania, Brazil, Turkey, Egypt, Saudi Arabia, Islamic Republic of Iran, Libyan Arab Jamahiriya, Mexico and Cameroon;

1986: Yugoslavia, Republic of Korea, Taiwan Province of China, Hong Kong, China, Romania, Turkey, India, Brazil, Islamic Republic of Iran, Egypt, Libyan Arab Jamahiriya, Saudi Arabia, Mexico and Cameroon;

1987: Republic of Korea, Yugoslavia, Taiwan Province of China, China, Turkey, Romania, Hong Kong, India, Brazil, Islamic Republic of Iran, Egypt, Mexico, Libyan Arab Jamahiriya and Cameroon.

Imports from least developed countries (LDCs)

7. Total covered and preferential imports of Austria from LDCs fluctuated from one year to another either because of the variability in their output or because of the mis-match between the scheme's product coverage and their export supply capabilities, or because of their failure to comply with the notification requirements under the scheme's origin rules. As shown in the table, the coverage ratio increased by 17 per cent from 1985 to 1986; but decreased by 25.3 per cent from 1986 to 1987. This was in marked contrast to the rate of utilization which, while decreasing by 16.3 per cent over the first period, increased by 23.4 per cent between 1986 and 1987. Of the nine LDCs receiving GSP treatment during the 1985-1987 period, two countries (Afghanistan and Bangladesh) accounted for most of preferential imports from LDCs and played a major role in the fluctuations of these imports.

Major products imported and their principal beneficiary suppliers in 1987

8. As shown in table 2 of the annex, 30 principal beneficiary suppliers, including the top 10 beneficiaries referred to in paragraph 6 above, accounted for 89.6 per cent ($567 million) of preferential imports from all beneficiaries in 1987. The bulk of these preferential imports consisted of industrial products ($534.4 million or 94.3 per cent).

9. The principal beneficiaries supplying the products listed in this table were: Yugoslavia, Republic of Korea, Taiwan Province of China, Hong Kong, China, Thailand, Turkey, Romania, Brazil, Ecuador, Malaysia and India.
